Hepatitis Testing

Collected Date: 12/1/2016 18:21 EST				
Test Name	In Range	Out of Range	Reference Range	Units
Hepatitis A Ab Total	Nonreactive		[Nonreactive]	
Hep B Core Ab Total	Nonreactive		[Nonreactive]	
Hep B Surface Ag	Nonreactive		[Nonreactive]	
Hep B Surface Ab	Nonreactive		[Nonreactive]	
HCV S/CO Ratio	0.11			S/CO
HCV Interpretation	Nonreactive ⁱⁿ¹		[Nonreactive]	

Interpretive Data

in1: HCV Interpretation
 Hepatitis C AB

<u>S/CO Ratio</u>	<u>Interpretation</u>
< 1.0	Non-Reactive
1.0 - 4.9	Weakly-Reactive
> 5.0	Reactive

Non-Reactive: A person with a non-reactive HCV antibody result is considered uninfected. No further action is needed unless recent infection is suspected. In these cases, consider repeat testing later to detect seroconversion..

Weakly-Reactive: HCV antibody test is abnormal, HCV RNA Qualitative test will follow.

Reactive: HCV antibody test is abnormal, HCV RNA Qualitative test will follow.

Note: HCV antibody testing is performed on the Abbott Architect system.
